Notes: All metal finishes will change over time

Aluminum Canopy, Blade Holder and Cup cannot be plated; they can only be polished or powder coated

Min 13 1/2" drop
Please specify overall drop

For DAMP locations
UA5026-4D M
(same price)

Please see Powder Coat Colors on our website under "Options"

Urban Archaeology takes apart a Hunter fan, removes the motor, sand-blasts the housing, refinishes all the visible metal parts, puts the motor back into the housing and rewires it before reassembling the unit. We replace the standard composite blades with hand-made, hand balanced blades made of solid mahogany and finished in your choice of light mahogany, special walnut or cherry. Other species such as cedar and teak are available upon request, call for pricing.
