

Edgar Brandt Gates

Edgar Brandt
ca 1930
wrought iron, brass
American

This exquisite set of Art Deco gates are a testament to the genius of their designer, Edgar Brandt. His mastery of wrought iron material, and progressive approach to new welding techniques allowed him to create the delicate, organic forms displayed in the gates. Perhaps one of Brandt's noted contributions to ironwork in the 20th century was his unique use of iron in combination with other metals such as bronze and steel.

These gates are accented with brass flowers skillfully welded to their wrought iron vines. Brandt's prolific work encompassed everything from furnishings, to lighting, to fine art pieces. These gates are a small piece in the history of one of the most significant metal artists of the 20th century. Other gates by Edgar Brandt are available.
