

**POURED STONE URN**

---

These intricately detailed urns were cast from poured stone, and feature a classically inspired Grecian motif around the urn's exterior face. The figures dance, arms interlocked, just above the beautiful, woven details of the carved pedestal. Each of the four available urns weigh approximately 1000 lbs. and boast a pair of leaden handles on either side. The urn stands 56" tall, on a 22" square base, with a 37" diameter at its widest point. The urns offered here, have been installed on the grounds of our Bridgehampton store for closer admiration.
