

**Lenox Cabinet Small/Medium — Installing Cabinet Frame**

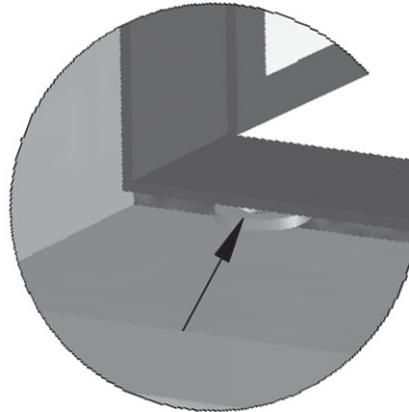

**Installing Cabinet Frame**

(This step requires 2 people)

1. Insert Lenox frame into Marble Box.
2. Check alignment of cabinet frame. Ensure door opens & closes and ball-catch actuates. Ball-catch tension can be adjusted by turning the ball end. If necessary, shim the frame inside the marble box using metal washer between the frame & Marble Box. Use stainless washers as shims.

Washer leveling frame.  
Inside rear view of frame.

3. Apply Silicone adhesive all around the Lenox Frame inside face or around the opening in the wall. Insert Lenox frame into wall and push to set silicone. Check operation of door and ball-catch. Use 2 people to test door. Recheck level.

Install Silicone around  
the inside frame edge

Push into opening and  
check alignment

4. Allow Silicone to dry completely before using cabinet.
